

Ecology Locker Jackets

The Locker Jacket is a project that is part research paper and part poster. You will need to read all of chapter 3, sections 1 - 3 and then choose a biome group topic and have it approved by your science teacher. The locker jacket itself is a poster designed to fit the outside of your locker door and present information about your topic. You need to include a 250 to 300 word summary of your topic; pictures with captions that help explain the topic and anything else that you feel would result in a creative presentation. Your Locker Jacket should be colorful and interesting enough to encourage people to stop and read it

Requirements

- Use the template and tag-board provided by your teacher to make the Locker Jacket.
- You should include a title on the front of your work.
- You must include your name on the back of your work.
- You may use pictures, drawings, graphs or any other visual aids.
- Any of the above should include a description written in a complete sentence.
- A 250 to 300 word summary of your topic should be included on the Locker Jacket.
- No pencil should be used in the final product.
- Make your Locker Jacket as colorful and creative as possible!
- Use all of the space provided, but do not have anything over-hanging the edges.
- Neatness counts!
